

SCHAEFFLER

Applications for MF Devices

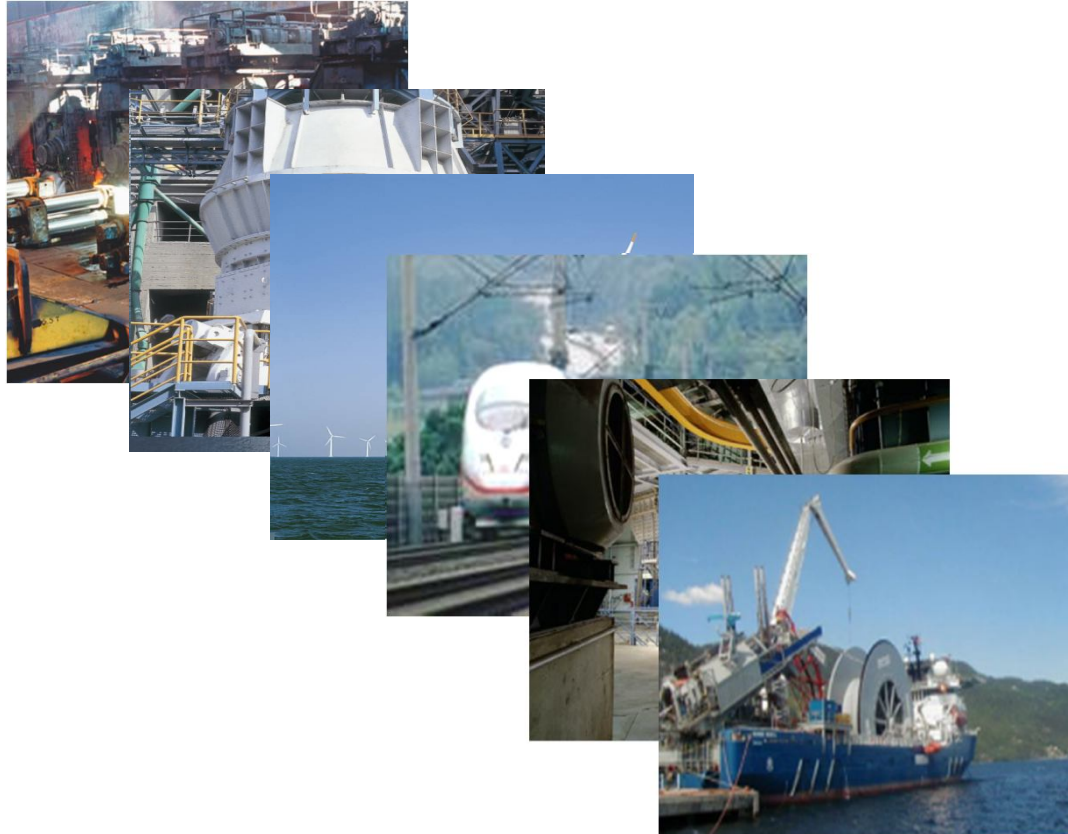

Branches

For which branches MF Equipment can be used?

SCHAEFFLER

Branches:

- ▶ Steel
- ▶ Mining Processing
- ▶ Wind
- ▶ Rail
- ▶ Production Machinery
- ▶ Power Transmission
- ▶ Marine
- ▶ others

For which applications the MF Equipment can be used?

Applications:

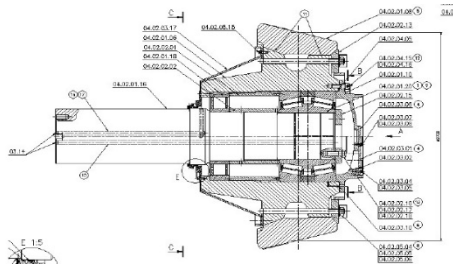

► Steel

- ▷ Hot / Cold Rolling Mills – Roller applications
- ▷ other applications where work pieces have to be heated for mounting and dismounting (e.g. couplings, gears, sleeves)

► Mining Processing

- ▷ Vertical Mills; – main assembly of the bearing
- ▷ other applications where work pieces have to be heated for mounting and dismounting (e.g. couplings, gears, sleeves)

For which applications the MF Equipment can be used?

Applications:

► Wind

- ▷ Main Bearing -- bearing and housing assemblies
- ▷ other applications where work pieces have to be heated for mounting and dismounting (e.g. generators, gearboxes)

► Rail

- ▷ Axle Box
- ▷ other applications where work pieces have to be heated for mounting and dismounting (e.g. wheels, traction motors,)

For which applications the MF Equipment can be used?

Applications:

- ▶ Power Transmission

- ▷ Gears, Couplings

- ▶ Marine

- ▷ Bearings, Housings

- ▷ Thruster -- e.g. liners

- ▷ other applications where work pieces have to be heated for mounting and dismounting (e.g. bolts)
